

SIGRIST-PHOTOMETER AG at Swiss Tunnel Congress in Lucerne

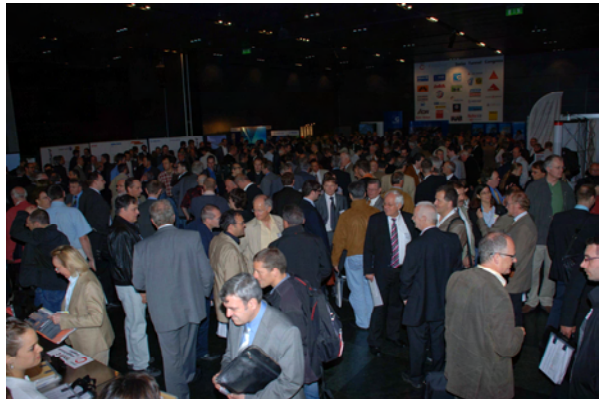

From June 10 to 12 the latest Swiss Tunnel Congress took place in Lucerne. Over 750 participants of totally 14 countries received an in-depth view of the capabilities of the Swiss tunnel industry. A series of technical presentations, excursions to current tunnel construction sites as well as an exhibition created a valuable meeting point for the industry audience.

SIGRIST-PHOTOMETER AG presented itself to the audience as an exhibitor of this congress. Shown at the stand were our products VisGuard (visibility monitor) and FireGuard (smoke and fire detector), both often and successfully used in road tunnels.

Beside the exhibition the social program offered the opportunity for meeting existing and new contacts. Our sales engineer for Switzerland – Renato Baldini – used this event accordingly.
