

The Swiss Trade Fair for Drinking Water, Sewage and Gas Experts is taking place on 7th - 9th February in Bulle.

We look forward to welcoming you at our booth 50-12 in hall 50! Take the opportunity to get hands-on experiences of our new BactoSense TCC, the online flow cytometer, with which you can detect more than 99% of microbial cells in water. The measured results are available after only 20 minutes.

We look forward to welcoming you!

Your Sigi crew
