

Pre-Launch Information

OilGuard 2 W

Oil trace monitor

What is new?

- Replaces OilGuard 2 with NPD filter set
- Based on AquaScat 2 WTM
- For non-Ex applications with a sample temperature of. 40°C max

Possible Applications

- Monitoring oil traces in raw water
- Monitoring oil traces in process and waste water
- Monitoring oil traces in surface water

Available

- Q2 / 2018

Advantages

- Proven UV fluorescence measuring principle
- True non-contact freefall measurement and thus extremely low maintenance
- Fast recalibration with checking unit
- Convenient operation via colour touchscreen display
- Display of values and / or graphs visualizing the measurements of the past month
- Correlates with all internationally acknowledged reference methods
- Compact design
- Long-lasting UV-LED
