

Maintenance Kit

For planned maintenance
activities and more!

MAINTENANCE KIT FOR PLANNED MAINTENANCE ACTIVITIES AND MORE!

NEW OFFERING

We have launched the SIGRIST Maintenance Kit fitting for our ScrubberGuard systems that facilitates the on site crew to

- (i) **keep up with planned maintenance activities and to**
- (ii) **react timely on any on-site service**

through the provision of key components of the system and this during the whole operation.

These activities are key to **maintain maximum operational safety** and are enhancing our concept of simple installation to **«simple maintenance»**.

Availability and backward compatibility

The SIGRIST Maintenance Kit is available

- (i) **for new deliveries by ordering the complete ScrubberGuard systems and**
- (ii) **as dedicated article for the already installed base as well.**

As a consequence all the named benefits can be realized for the existing installations as well.

Optimized content

The components delivered with the Maintenance Kit are essential to carry out activities respecting the maintenance schedule up to the first 2 years of the impacted ScrubberGuard. Articles that have been

used or that are foreseen to be short at the given ScrubberGuard, can be reordered as precaution measure for extending operational safety. The robust plastic case is fitting for a typical installation place or storage location, its content is matching to various ScrubberGuard versions, following SIGRIST's modular ScrubberGuard design.

Simple reordering, access to guidelines

The relevant article numbers can be also retrieved by scanning the QR-code, therefore the crew member can easily initiate reordering of the used components or the whole kit in line with the instruction from the maintenance schedule.

For detailed questions regarding the Maintenance Kit please turn to our representative or on technical questions you might contact support@photometer.com.

COMPONENT OVERVIEW

Article No.	Description	Quantity
121823	Impeller-/sealing-kit with rotating mechan. seal for sample inlet pump type A	2
121973	Impeller for sample inlet pump type A	6
121824	Impeller-/sealing-kit with rotating mechan. seal for outlet pump type B	2
121974	Impeller for sample outlet pump type B	6
121460	pH sensor ScrubberGuard	1
121467	DC pump with screw connection ScrubberGuard	2
122084	Flow sensor Vortex G3/4" DN10 for ScrubberGuard	1
121475	Flow sensor Vortex G1/2" DN6 for ScrubberGuard	1
121838	Pressure sensor ScrubberGuard	1
121477	Solenoid valve for ScrubberGuard	1
121409	Deaeration tube for ScrubberGuard, replacement	1
121661	Float switch complete: ScrubberGuard	2
116627	Air filter for AquaScat SG (A) and OilGuard SG (A)	4
122156	Rotating mechan. seal	2
121997	Deep groove ball bearing 6202 - fan side	1
121998	Deep groove ball bearing 6203 - pump side	1
